

GEO DOMES

Geodesic dome kits

For guest accommodation,
retreats and studios.

Australia & New Zealand

YURT IN THE DIRT

6 m GEO DOME, Southwest Western Australia.

THE EXPERIENCE BEHIND YURT IN THE DIRT

Practical experience for your project.

Yurt in the Dirt grew from our own journey into off-grid living and a different way of life.

We spent over four years living off-grid as a family in an 8-metre yurt. We experienced the freedom of building something with our own hands, alongside the practical realities of making it a comfortable home.

I started Yurt in the Dirt to make alternative accommodation simpler and more affordable for Aussies and Kiwis wanting to create something special on their land.

Since then, we've helped 150+ clients create off-grid retreats, studios and alternative accommodation across Australia and New Zealand.

That experience still shapes how we work: straightforward advice, carefully considered products and practical support from the first conversation through to assembly. This brochure takes you through our Geo Domes, the kit inclusions and the choices available for your project.

Ryan Smith

Founder, Yurt in the Dirt / Denmark, Western Australia

Sacred geometry meets divine nature.

The triangular steel frame creates the dome's shape. A panoramic front opens up the outlook, while the insulated lining and tailored curtains finish the interior.

Watch the assembly overview, then explore the photos for a closer look at the structure and finishes.

YOUR SPACE

What would you do with a Geo Dome?

A retreat on your land

A private space for weekends, visiting family or time away. Plan the services and fit-out around how you will use it.

Glamping accommodation

A bed facing the view, a sitting area and your own bathroom arrangement. Create a guest stay suited to your property.

Yoga & wellness

Keep the floor open for mats and movement. Place storage around the perimeter and plan for ventilation.

A creative space

A music room, office, art studio or play area. Set it up for one use, or leave the layout flexible.

Stu's 6 m dome, rural Victoria.

SIZES

Find your size.

Geo Domes come in six sizes from 5 to 10 metres.

19.6 m²

28.3 m²

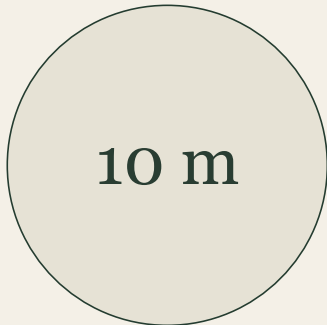

38.5 m²

50.3 m²

63.6 m²

78.5 m²

Nominal circular floor area, before framing, lining, partitions and fit-out.

Start with what needs to fit.

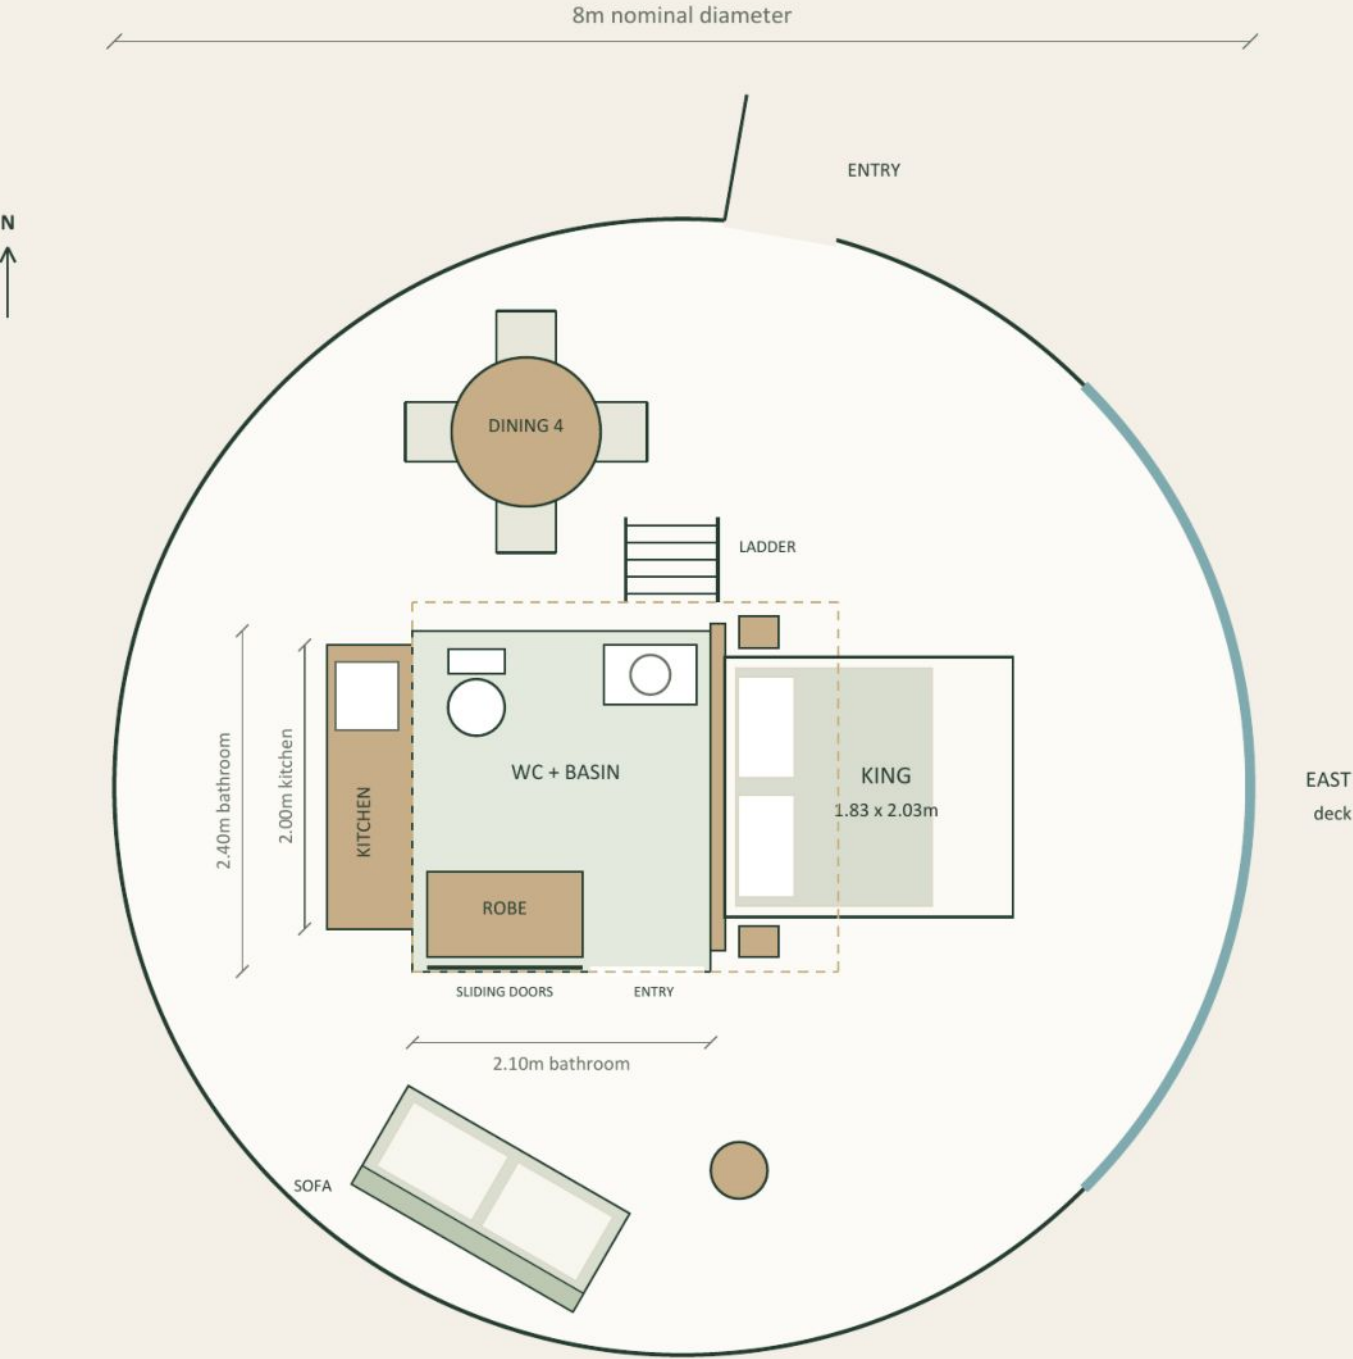

A bed and sitting area, an open studio, or separate rooms. The furnished example over the page shows an 8-metre dome with a compact kitchen, WC and basin.

8-metre Geo Dome floor plan

A king bed, kitchenette, dining and living space, with a compact WC and basin room.

The dashed outline shows a sleeping-loft concept above. Bathing is arranged separately in this example.

Make the layout your own. Internal rooms, loft and furnishings are arranged separately from your dome kit.

DOOR + PANORAMIC FRONT

Glass where it matters.

Illustrative exterior. Deck, furnishings and outdoor facilities are separate.

01 / Double-glazed front door

A frosted glass door in an aluminium frame is included. Choose a standard key lock or smart keypad lock.

02 / Panoramic outlook

The standard front is clear PVC, designed as a removable section so it can be replaced separately.

03 / Double-glazed glass-front option

Ask us about replacing the clear-PVC section with glass. The concept shown here illustrates this option.

WINDOWS + VENTILATION

Opening portholes. Fresh air.

Opening porthole with insulated lining flaps.

Two opening portholes

Round glass windows open for fresh air, with insect mesh to help keep insects out. Two are included, with extra windows available as an option.

Solar ventilation fan

The included solar fan draws warm air out without a separate power supply. Additional solar vents can be discussed for your setup.

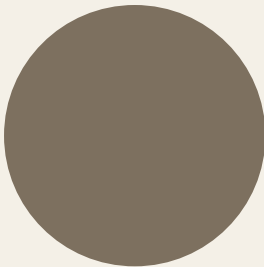

Everyday ventilation

Opening windows and the solar fan help manage heat and moisture. Many of our clients also install air conditioning or heating, arranged separately to suit their dome.

EXTERIOR

Colours inspired by nature.

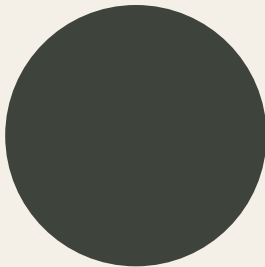

Four matte outer-cover colours.

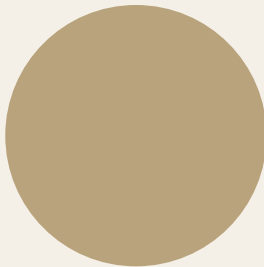

Fawn Brown

Soft Ivory

Woodland Green

Sandstone Beige

Illustrative colour renders. Screen and print colour may vary.

INTERIOR

Choose your lining and curtains.

Insulated canvas lining

Warm Cream

Riverstone Grey

Sandstone Beige

Tailored panoramic curtains

CONSTRUCTION

See how a Geo Dome comes together.

Layers shown separately. Black frame and optional double-glazed glass front illustrated.

Exterior cover

Double-coated 850gsm PVC forms the weather cover. A tensioning system keeps the cover fitted to the frame.

Insulated interior lining

Canvas lining finishes the inside of the dome. Reflective aluminium air-cell insulation is bonded to the back of the lining.

Steel frame + openings

Steel frame available in black or white powder-coated finish. Double-glazed entry door, two opening portholes, hardware and fixings are supplied.

Decking plans for every size

Ask for plans matched to your dome. Your deck or foundation is prepared separately before the kit is assembled.

A REAL DOME PROJECT / RURAL VICTORIA

Inside Stu’s 6-metre dome.

SUPPLY, SUPPORT AND CONSTRUCTION

Your Geo Dome. Your project.

Your dome kit

Steel frame, matte PVC cover, insulated lining with reflective air-cell backing, double-glazed front door, two porthole windows with insect mesh, solar fan, tailored curtains, hardware and tensioning system.

Our practical support

Size-specific decking plans, assembly information and practical support before and during your build. Talk through the site, configuration and options with us.

Your site and fit-out

Arrange the deck or foundation, flooring, internal rooms, furniture, plumbing, electrical and local labour. Lofts and bathrooms need their own design and construction.

Before you order

We'll confirm the size, openings, colour choices and selected options in your quote. Approval requirements depend on the property and intended use.

YOUR NEXT STEP

Discuss your project.

Tell us the size you're considering, where it's going and what you'd like to use it for. We'll help you settle the options and put a quote together.
